

# How to Program your Powerwall for Time of Use

If you are on a Time Of Use rate schedule with your electricity provider, you can program the Powerwall for maximum savings within the Tesla mobile app. To do this open the Tesla app and follow these simple instructions.

1. From the Main Menu scroll scroll the menu up and select the **Customize** menu.

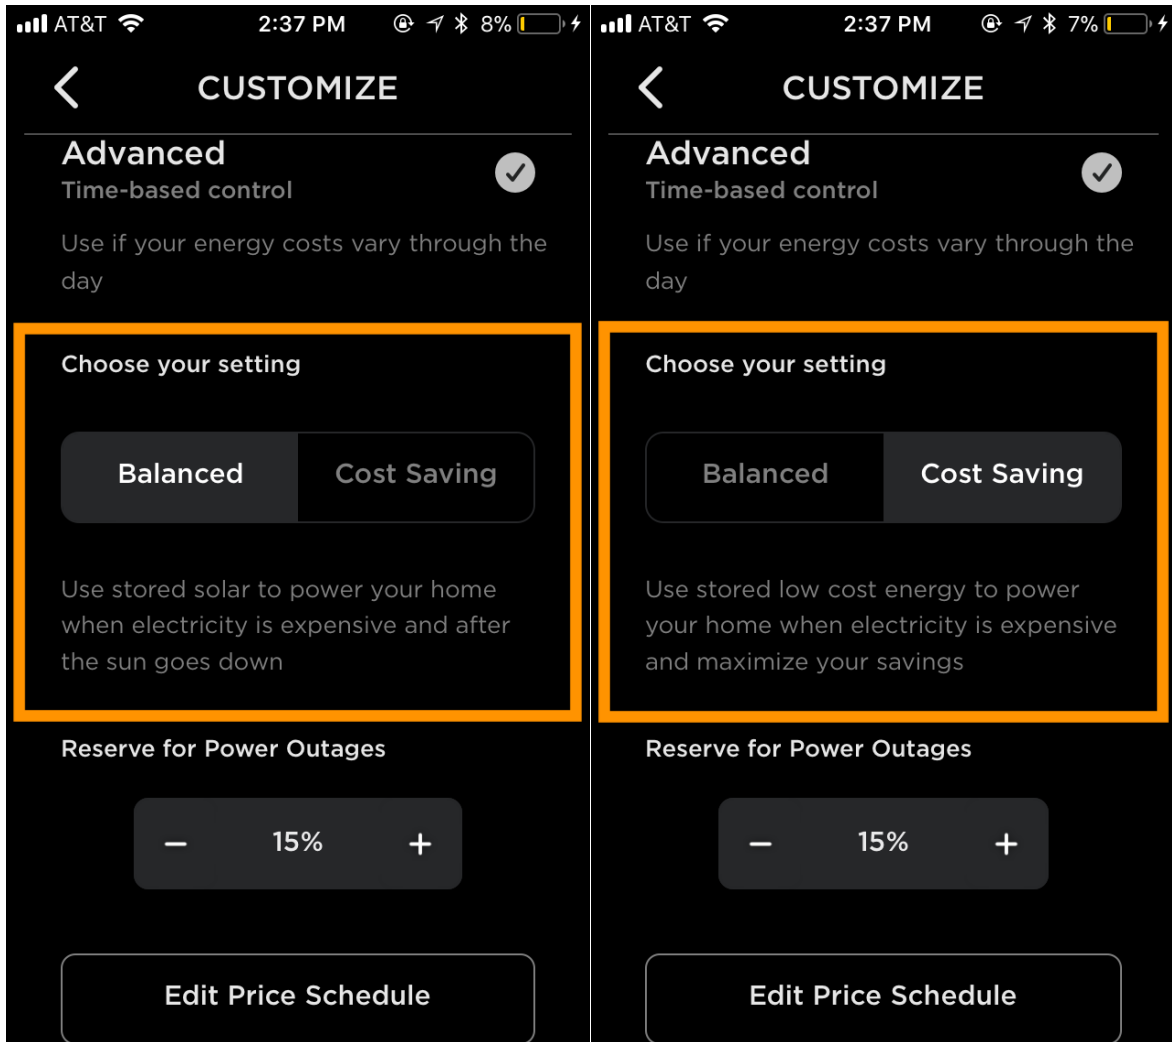

2. In the **Customize** menu, select the **Advanced** option.

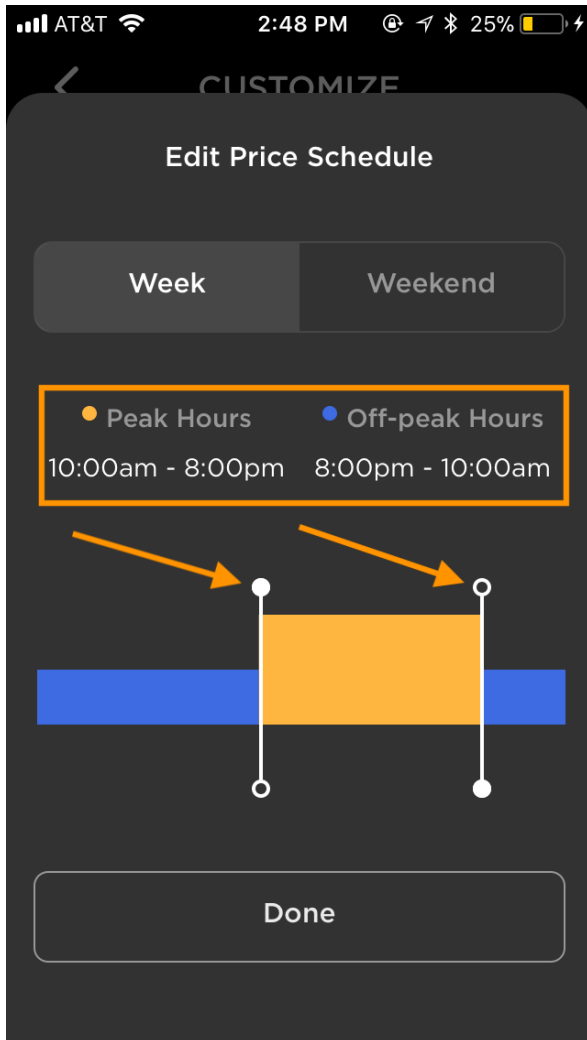

3. Choose between **Balanced** and **Cost Saving** options.

- **Balanced** - Use stored solar to power your home when electricity is expensive and after the sun goes down.
- **Cost Saving** - Use stored low cost energy to power your home when electricity is expensive and maximize your savings.

4. Press the **Edit Price Schedule** button at the top of the menu. Drag the sliders on the Week and Weekend graphs to match your utility rate schedules.

Consult your electricity bill to determine the correct TOU rate. Click the links below to determine the TOU rate schedule for your utility (subject to change).
